

Week 1 – x-tables

Use the x-table grids to check your child knows their multiplication facts up to 12x12. It is vital that the pupils are confident recalling their x-tables, including using the inverse (e.g. can tell you that $8 \times 7 = 56$ and that $56 \div 8 = 7$).

For more fun practice, encourage your child to fine tune their skills on TT Rockstars, our free online game platform for all KS2 students. You can visit the site at <https://play.ttrockstars.com/>
